Summary

With over 7+ years of demonstrated proficiency, I bring extensive experience in the strategic management, design, and architecture of both On-Premises and Cloud infrastructures. My focus is on tackling complex challenges, optimizing costs, and delivering substantial benefits for organizations.

- Cloud: Hands-on experience with AWS (IaaS) Services - EC2, VPC, IAM, S3, CloudWatch, etc.
- Microsoft: Proficient in Active Directory, DNS, DHCP setup, and troubleshooting.
- O365: Experienced in Microsoft O365 domain setup, license, and security management.
- McAfee: Trellic-driven compliance management using McAfee ePO.
- Operating Systems: Skilled in managing Windows Server, Linux, and Mac operating systems.
- Data Management:
Backup: Symantec DLO expert - from setup to backup schedule and integration with cloud storage (NAS and AWS S3).
- Collaboration Tools:
Knowledge in GitHub, Atlassian JIRA, and Confluence.
- Virtualization and Networking:
Virtualization: Hands-on experience in VM management using ESXi and VB.
Network: Proficient in CISCO ASA, Router Site-to-Site VPN configuration.
- Security and Compliance:
Successfully managed SOC2 Audits. Resolved the vulnerabilities identified during VAPT.
- Process Excellence:
Documentation: Proven experience in Process Creation and Documentation.
- Ticketing Tools:
Ticket Maestro: Proficient in various ticketing tools such as Zendesk, Freshdesk, and BMC Remedy.
- Always Evolving:
Continuous Learner: Committed to staying updated with the latest industry trends and technologies.
- Passionate Professional:
Driven by Excellence: Committed to delivering top-notch solutions and ensuring seamless IT operations.

Let my experience and expertise elevate your IT infrastructure to new heights!
